## EXPLANATORY NOTES

### INTRODUCTION

This issue of Divisional Statistics is the seventh of a series, which is designed to satisfy the increasing demands of statistical users for information concerning various areas of the State.

Previous issues have contained data for areas of the State delineated as statistical divisions and subdivisions, which were themselves mainly amalgamations of local government areas. The boundaries of these present divisions and subdivisions were determined in 1976 within the ABS after extensive consultation and advice from known users of statistical data and other parties interested in regional analysis. They were designed so that information would be presented for areas of interest while also maintaining a high degree of rationality in the groupings used.

Thus, these statistical divisions represented closely allied and meaningful areas of production and community of interest. Even though homogeneity and community of interest have always been regarded, somewhat loosely, as prime determinants of regional groupings, an attempt was made when formulating these statistical boundaries to give a more precise meaning to the items used and to clarify what constitutes a region. Factors taken into account were differential living zones, patterns of retail shopping, location and nature of industry, transport routes, provincial newspaper circulation, coverage of provincial radio and television stations, spheres of activity of cultural groups and sporting associations and recommendations of the Committee on Uniform Regional Boundaries.

The Adelaide Statistical Division retains exactly the same boundary as under the old area groupings. Originally introduced by the ABS as a basis for the publication of the 1966 Population Census results, this area boundary has remained constant since then.

### 1. ESTIMATED RESIDENT POPULATION

The Estimated Resident Population is the new official population estimates series, compiled according to the place of usual residence of the population. A description of the new conceptual basis is contained in Population Estimates : An Outline of the New Conceptual Basis of Population Estimates (3216.0).

Estimated resident populations for June 1977 and subsequent periods are subject to revision once final 1981 Census results become available.

Final processing of the 1981 Census is likely to result in minimal changes, but differences between preliminary and final estimates of residents temporarily overseas at census dates may be more significant.

### 2. DWELLINGS : CENSUS DATA

The term dwelling includes houses, home units and flats, and in addition habitations ranging from a single-roomed shack to a multi-roomed hotel or institution.

Unoccupied Dwellings: Includes a dwelling normally occupied but from which the usual occupants were temporarily absent on the night of the population census, a newly-completed dwelling not yet occupied, vacant dwelling available for sale or renting.

### 3. EMPLOYED PERSONS

Industry is defined as any single branch of productive activity, trade or service. All persons engaged in any such branch of economic activity are classified to the particular branch in question, irrespective of their own personal occupation within the industry. For example, a carpenter working for a retail store is classified to the industry of his employer; that is, commerce.

Occupation is defined as the type of work performed by an employed person.

### 4. RANDOM ERROR IN POPULATION CENSUS DATA

- (a) No reliance should be placed on cells of three or less. Even without random error firm reliance should not be placed on small cells since possible response and processing errors have greatest impact on small cells.
- (b) Some small cells have been randomly altered to zero. Hence caution should be exercised in stating that there are no persons in an area having certain characteristics.

### 5. BIRTHS AND DEATHS

Births are allocated to the local government area or unincorporated area of usual residence of

mother. Where the usual residence is not in this State the birth is coded to the location of the hospital where it occurred.

Deaths registrations are allocated to the local government area or unincorporated area of usual residence. People who normally resided in another State are coded to the area in this State in which the death occurred.

## 6. SCHOOLS

These statistics relate to all schools and full-time students in primary and secondary education in South Australia. Special schools and correspondence schools are included while pre-school centres and classes, adult education centres, and coaching establishments are not. Business colleges are also excluded unless they provide courses which match those available in secondary schools. If this is the case only full-time students taking those particular courses are included.

The details for government schools have been derived from information supplied by the South Australian Education Department, while those for non-government schools have been obtained from a census of non-government schools conducted by this Bureau.

## 7. BUILDING APPROVALS

Statistics of building approvals are compiled from:

- (a) permits issued by local or other government authorities in areas subject to building control by those authorities; and
- (b) contracts let, or day labour work approved by Commonwealth, State, semi-government and local government authorities.

In addition, major building activity which takes place in areas not subject to the normal administrative approval processes (e.g. mining leases) is also included.

The statistics relate to building structures and exclude railways, roads, bridges, earthworks, and other non-building construction. Repairs and maintenance are excluded. All new dwellings (irrespective of value), new other building valued at \$10,000 and over and alterations and additions (to both dwellings and other building) valued at \$10,000 and over are included.

A Dwelling is classified as either a House or an Other dwelling.

(a) A House is defined as a building which has been designed or adapted so that its prime purpose is to be a single self-contained dwelling unit (i.e. includes bathing and cooking facilities), which is completely detached from other buildings, and occupies (except in such cases as dwellings built for employees or families of the owner or lessee of the land) a separate titled block of land.

(b) An Other dwelling is defined as a self-contained dwelling unit other than a house. These include flats, home units, semi-detached dwellings, villa units, town houses, etc.

Values shown represent the estimated value when completed (excluding value of land) of new buildings and alterations and additions to existing buildings.

## 8. AGRICULTURAL PRODUCTION

Statistics in this publication are derived from the annual Integrated Agricultural Commodity Census (IACC), conducted throughout Australia at 31 March, which collects data from establishments with agricultural activity, and refer to aggregations of operations at single specific locations. An owner or occupier who works more than one location is normally required to report details for each location. However, where the locations are near to one another and are in effect worked as one establishment, a composite return is obtained and is treated as covering a single establishment in the district in which the main location is situated.

In recent years, in order to minimise respondent burden and reduce processing costs, the ABS has been gradually excluding from the statistics those establishments which make only a small contribution to overall agricultural production. Since 1976-77, establishments with agricultural activity have been included in the IACC where the enterprise operating one or more of the establishments had, or was expected to have, an estimated value of agricultural operations of \$1,500 or more. While this has resulted in some changes in the counts of numbers of establishments appearing in publications, the effect on the statistics of production of major commodities is small. Statistics of minor commodities normally associated with small scale operations may be affected to a greater extent.

Area of pasture includes lucernes, clovers, grasses and medics at 31 March 1981, irrespective of when they were sown. It excludes cereals e.g.

oats which were grazed or cut.

Milk cattle are those cattle kept mainly for the production of milk or cream for sale.

Meat cattle are those cattle kept mainly for the production of meat.

#### 9. RETAIL AND SELECTED SERVICE ESTABLISHMENTS

The 1979-80 Census included all establishments classified to the Australian Standard Industrial Classification (1978 Edition) (ASIC) Subdivision 48 (Retail Trade) and the 'selected service' classes from ASIC Division L (Recreation, Personal and Other Services). The ASIC classes from Division L were 9133 - Motion picture theatres, 9231 - Cafes and restaurants, 9232 - Hotels, etc. (mainly drinking places), 9233 - Accommodation, 9241 - Licensed bowling clubs, 9242 - Licensed golf clubs, 9243 - Licensed clubs n.e.c., 9340 - Laundries and dry cleaners, 9351 - Men's hairdressers and 9352 - Women's hairdressing and beauty salons.

Details of bread and milk vendors are not included in the figures. Excluded from the Census because of difficulties in ensuring adequate coverage were door-to-door salesmen, independent van salesmen (of all kinds other than independent bread and milk vendors), occasional stall holders and organisations operating vending machines on the premises of other businesses.

Establishments at 30 June. The number of establishments in operation at 30 June relates to retail and selected service establishments as such and does not include the number of separately located administrative offices and ancillary units.

Persons employed. Working proprietors and employees (including both full-time and part-time) on the payroll, including those working at separately located administrative offices and ancillary units. Unpaid helpers are excluded.

Wages and salaries. The wages and salaries of all employees of the establishment, including those working at separately located administrative offices and ancillary units. Drawings of working proprietors are excluded.

Turnover. Sales of goods (retail and wholesale), all other operating revenue from outside the enterprise such as repair and service revenue; hiring of consumer goods; commissions; takings from meals and accommodation, hairdressing, theatre admissions and laundry and dry cleaning; and rent, leasing and hiring revenue. Receipts

from interest, royalties, dividends and the sale of fixed tangible assets are excluded.

Further explanatory notes appear in Census of Retail Establishments and Selected Service Establishments : Industry and Commodity Details by Statistical Retail Area and Local Government Area, South Australia (8623.4).

#### 10. MANUFACTURING ESTABLISHMENTS

The annual manufacturing census is conducted throughout Australia on an integrated basis with other economic censuses (e.g. the annual mining census, the annual censuses of electricity and gas, and the periodic retail trade and wholesale trade censuses).

Manufacturing, as specified in Division C of the ASIC, broadly relates to the physical or chemical transformation of materials or components into new products, whether the work is performed by power-driven machines or by hand.

In accordance with the ASIC the basic census unit (referred to as the establishment) in respect of which statistics are collected in integrated economic censuses is in general a unit covering all the operations carried on under the ownership of one enterprise (business) at a single physical location. For manufacturing censuses, a manufacturing establishment is thus predominantly engaged in manufacturing activities, but the data collected for it cover (subject to the exception mentioned below) all activities at the location, namely:

- (a) the manufacturing activities primary to the industry class to which the establishment is classified;
- (b) any other manufacturing activities (i.e. production of commodities primary to another manufacturing industry class);
- (c) any selling and distribution activities connected with the commodities manufactured; and
- (d) any non-manufacturing activities (e.g. merchandising of goods not manufactured by the establishment, extraction of raw materials for use by the establishment).

The exception relates to locations where the subsidiary activities exceed a specified value (\$3.2 million for 1980-81) in terms of sales and transfers out of goods and services during the year; these locations are treated for statistical purposes as two or more establishments corres-

ponding to the various kinds of activity carried on.

The establishment statistics also include data relating to separately located administrative offices and ancillary units (such as head offices, storage premises and manufacturers sales branches or sales offices) serving the establishment and forming part of the enterprise which owns and operates the establishment. It should be noted however that sales branches or offices which distribute to customers from stocks held by them are classified to the wholesale industry.

The information shown in the table for the various items defined below refers to establishments which operated at any time during the year.

Establishments at 30 June. The number of establishments in operation at 30 June relates to manufacturing establishments as such and does not include the numbers of separately located administrative offices and ancillary units.

Employment. Working proprietors and employees on payroll, including those working at separately located administrative offices and ancillary units.

Wages and salaries. The wages and salaries of all employees of the establishment, including those working at separately located administrative offices and ancillary units. Drawings of working proprietors are excluded.

Turnover. Sales (exclusive of excise and sales tax) of goods, whether produced by the establishment or not, plus transfers out of goods to other establishments of the same enterprise, plus bounties and subsidies on production, plus all other operating revenue from outside the enterprise (such as commission, repair and service revenue, and from 1978-79 rent, leasing and hiring revenue), plus capital work done for own use, or for rental or lease. Receipts from interest, royalties, dividends, and the sale of fixed tangible assets are excluded.

Value added. Turnover plus increase (or less decrease) in the value of stocks, less purchases, transfers in and selected expenses.

Further explanatory notes appear in Manufacturing Establishments : Small Area Statistics, South Australia (8203.4).

#### 11. LOCAL GOVERNMENT FINANCE

These statistics are derived from the Standardised System of Local Government Finance

Statistics (SLGFS). More detailed statistics are contained in SLGFS which is available on microfiche or magnetic tape.

Ordinary Services: Includes the general functions of local government authorities, but excludes details of their trading activities such as electricity undertakings.

#### Outlay from Revenue and Loans:

Debt Charges, Levies and Donations: Includes principal and interest payments on long-term debt, compulsory levies paid to government and voluntary payments to non-profit organisations.

General Administration: Includes only those expenses relating to council members, executive staff and 'head office' type expenses.

Community Amenities: provision of council houses, town and regional planning, sanitary and garbage disposal, urban drainage, street cleaning, effluent drainage, public conveniences and cemeteries.

Recreation and Culture: provision of facilities and support of organisations concerned with leisure time activities and sport, support of the performing arts and preservation of the national estate.

#### Revenue and Loan Receipts:

Rates and Ex-gratia Receipts: Includes gross rates levied less remissions, plus subsidies and penalties, and revenue in lieu of rates for exempt properties.

Charges: revenue from sales of goods and services, and rent from properties.

Government Grants: Includes Commonwealth and State Government specific purpose grants and Commonwealth general purpose grants under the personal income tax sharing arrangement.

Other revenue: includes licences, fees and fines, interest received, sale of land and fixed assets, contributions and reimbursements received.

#### CHANGES TO LOCAL GOVERNMENT AREAS

- (1) On 1 July 1981 an area of Lincoln (DC) was gained by Port Lincoln (C).
- (2) Monarto (M) ceased to exist on 13 August 1981.

- (3) An area of Pirie (DC) was annexed to Port Pirie (C) on 30 November 1981, therefore, building approval data shown for these two local government areas are not strictly compatible as they refer to slightly different areas over the year 1981-82.

#### RELATED PUBLICATIONS

Current publications produced by the ABS are listed in the Catalogue of Publications, Australia (1101.0). The ABS also issues, on Tuesdays and Fridays, a Publications Advice (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

#### SYMBOLS AND OTHER USAGES

- n.e.c. not elsewhere classified
- n.p. not available for publication but included in totals where applicable
- .. not applicable
- nil or rounded to zero
- (C) Municipality with city status
- (DC) District Council
- (M) Municipality

Where figures have been rounded, discrepancies may occur between sums of the component items and totals.
